6. SPILL MEASURES

Hoover the spilled product (to avoid raising dust).

Avoid moistening the product (wet clay can be slippery).

Deal with the recovered product as indicated in section 12.

Keep in sealed containers.

Individual measures: in case of dust formation, wear an anti-dust mask type FFP3.

Environmental measures : environmental information section 10.

7. HANDLING AND STORAGE

7.1 HANDLING

Reduce as much as possible dust formation and use adequate ventilation system. If the ventilation system of the premises is not sufficient, wear a respiratory gear type FFP3. Avoid eye contact. The product can be slippery when wet. The product is non-flammable. Minimize environmental release, using filters for ventilation systems for example.

Advice on general occupational hygiene: Wash your hands after every use. Remove soiled clothes and protective equipment before getting into a catering area.

7.2 STORAGE

Keep the product in its closed container in a dry and well-ventilated place. Keep the container closed to avoid dust formation.

8. EXPOSURE CONTROL

8.1 CONTROL PARAMETERS

Components	Exposure Limits	Type of value	Source	Biological limit values	Exposure limits in air	DNEL/PNEC Values
Pink clay	0.1 mg/m ³	VME – 8h	Decree n° 2012-746, May 9th, 2012	N/A	N/A	No available data

For occupational limit values applicable in other countries, please refer to local Regulations.

Recommended follow-up procedures

In order to monitor individual and environmental exposures, the recommended methods are described below:

- A decree issued on December 15th 2009 related to technical controls of occupational limit values at work and to certification standards of control agencies.
